The power of this course comes from the fact that we teach very effective techniques on accessing the subconscious as well as superconscious mind. People gain more control over their lives by opening to the more powerful part of their mind and spirit, the higher seat of intuition.

Students are gently guided to access higher dimensions in the pursuit of learning to manifest their goals and dreams via the language of imagery that speaks to the subconscious mind directly.

Over five weeks students practice habits that enable them to make remarkable changes in their lives. Manifesting goals is the first outward step toward realizing that we are co-creators in this alive universe.

In this way the *Living From Vision*® course teaches the fundamentals of a spiritual life without dogma.
